ABOUT US

Professional success in Finance has never been so dependent on practical and updated skills set. In a highly competitive professional environment when the economy changes under the numerous influence of metacrizes, the stewardship provided by high education is a significant competitive advantage.

Master of Applied Finance Program provides access to top, world class applications to case studies in corporate governance and investment finance.

The program is convenient, student-user friendly yet intellectually provocative in understanding the new economic order and how a graduate student of MAF can provide improvements and solutions to our business, economic, social environment.
